This is the ninth edition of the leading international event for e-voting experts from all over the world, taking place in Tarragona in October 2024.

One of E-Vote-ID’s major objectives is to provide a forum for interdisciplinary and open discussion of all issues related to electronic voting (including, but not limited to, polling stations, kiosks, ballot scanners, and Internet voting). In the first eight editions, over 270 presentations were discussed, gathering more than 1200 participants. The format of the conference is an in-place three-day meeting. No parallel sessions will be held and sufficient space will be given for informal communication.

The aim of the conference is to bring together e-voting specialists working in academia, politics, government, and industry in order to discuss various aspects of all forms of electronic voting. To address the interdisciplinary character of the conference, the conference has four tracks and a PhD colloquium:

**Track 1: Security, Usability and Technical Issues**

**Chairs:** Budurushi, Jurlind (Qatar University, Qatar) and Blom, Michelle (The University of Melbourne, Australia)

- (Remote) Electronic voting protocols and systems: design and analysis;
- New types of voter identification and authentication;
- Ballot secrecy, receipt-freeness, and coercion resistance;
- End-to-end verifiability;
- Risk limiting audits;
- Requirements and formal modelling;
- Evaluation and certification, including international security standards;
- Risk assessment
- Voter authentication
- Human aspects of security mechanisms in electronic voting and in particular of verifiability mechanisms;
- Or any other security and Human-Computer Interface (HCI) issues relevant to (remote) electronic voting.

**Track 2: Governance Issues**

**Chairs:** Spycher-Krivonosova, Iuliia (University of Bern, Switzerland) and Rodriguez, Adrià (Scytl and Universitat Pompeu Fabra, Catalonia)

This track is intended to cover all non-technical issues that occur during the digital transformation of elections including, but not limited to the following:

- Legal, political and social issues of electronic voting implementations, ideally employing case study methodology;
- Interrelationship with, and the effects of, electronic voting on democratic institutions and processes;
- Cultural impact of electronic voting on institutions, behaviour, and attitudes of the Digital Era;
- Administrative, legal, political and social issues of electronic voting;
- Electronic voting legislation;
- Public administrations and the implementation of electronic voting;
- Understandability, transparency, and trust issues in electronic voting;
- Data protection issues;
- Public interests vs. PPP (public private partnerships).

**Track 3: Election and Practical Experiences**

**Chairs:** Martin-Rozumilowicz, Beata (Independent Electoral Expert, UK) and Spycher, Oliver (Swiss Federal Chancellery, Switzerland)

- Review developments in the area of applied electronic voting;
- Report on experiences with electronic voting or the preparation thereof (including reports on development and implementation, case law, court decisions, legislative steps, public and political debates, election outcomes, etc.);

These experiences and practical reports need not contain original research, but must be an accurate, complete, and, where applicable, evidence-based account of the technology or system used.
Paper submissions can be in the following formats:

- **Full papers** need to contain original unpublished research. The submission should be max 16 pages in LNCS format.
- **Work-in-Progress** submissions contain ongoing original research. The submission should be max 20 pages in LNCS format or max 10,000 words. Initial submissions are format-neutral. If submissions are accepted, the authors are expected to provide a short summary of their key contributions (max 4 pages in LNCS format). This submission route enables authors to receive feedback on work in progress without pre-empting publication in a different venue (e.g., an academic journal).
- **Short Papers** are a maximum of 4 pages long in LNCS format all-in. In Tracks 1 and 2, such papers have a smaller contribution than a full paper.

**Key Dates for Submissions**

- **Track 1 (Security, Usability and Technical Issues) and Track 2 (Governance Issues)**
  - 15 May 2024 – 23:59 (AoE, hard deadline, no extension) - Deadline for submission of papers. (It will be possible to resubmit until 18 May 2024, but no new paper will be accepted after 15 May).
  - 23 June 2024 - Notification of Acceptance.
- **Track 3 (Election and Practical Experiences) and Track 5 (PhD Colloquium)**
  - 10 July 2024 – 23:59 (AoE, hard deadline, no extension) - Deadline for submission of papers. (It will be possible to resubmit until 13 July 2024, but no new paper will be accepted after 10 July).
  - 14 August 2024 - Notification of Acceptance.
- **Track 4 (Poster and Demo Session)**
  - 15 September 2024 – Submission deadline

**Venue**

E-Vote-ID 2024 will take place in Tarragona, in the south of Catalonia, and will be hosted by Universitat Rovira i Virgili.

**Steering Board**

The Steering Board of the conference is composed of the track chairs that served in the previous two editions. It is continuously renewed with former chairs. The mission of the steering board is to support the current general and track chairs with the promotion of the conference and to assist with conflicts of interest emerging as a result of current chairs submitting papers to the conference.

The current members of the Steering Board are: Micha Germann, Nicole Goodman, Thomas Hofer, Robert Krimmer, Oksana Kulyk, Peter Y.A. Ryan, Mihkel Solvak, and Vanessa Teague.
